The baseball data consists of three data sets on baseball hitters, baseball pitchers, and baseball teams. These three data sets are represented separately in the reformatted files.

The baseball data consists of the following files:

Name: baseballdescription.txt
Format: Text
Description: Text format data copied from http://lib.stat.cmu.edu/datasets/baseball.data without alteration, including prefatory material and variable descriptions. This file includes all three data sets on hitters, pitchers, and teams [original]

Name: baseballcodebook.pdf
Format: PDF
Description: PDF file of descriptive information and variable listing relating to the baseball data, derived from the original text file.

Name: baseball.csv
Format: CSV
Description: Data on all three categories (hitters, pitchers, and teams), reformatted into a comma-delimited file, with headers representing variable names

Name: baseball.xlsx
Format: xlsx (Excel 2007 XML)
Description: Data on all three categories (hitters, pitchers, and teams), reformatted into an Excel file, with headers representing variable names. Each data set is on a separate tab.

Name: baseballhitters.csv
Format: CSV
Description: Data on hitters reformatted into a comma-delimited file, with header representing variable names

Name: baseballhitters.xlsx
Format: xlsx (Excel 2007 XML)
Description: Data on hitters reformatted into an Excel file, with header representing variable names

Name: baseballpitchers.csv
Format: CSV
Description: Data on pitchers reformatted into a comma-delimited file, with header representing variable names

Name: baseballpitchers.xlsx
Format: xlsx (Excel 2007 XML)
Description: Data on pitchers reformatted into an Excel file, with header representing variable names

Name: baseballteams.csv
Format: CSV
Description: Data on teams reformatted into a comma-delimited file, with header representing variable names

Name: baseballteams.xlsx
Format: xlsx (Excel 2007 XML)
Description: Data on teams reformatted into an Excel file, with header
representing variable names
